

17. The article of claim 16, wherein the radiation-curable composition layer covers substantially all of the structured surface.
18. The article of claim 15, wherein the radiation-curable composition is substantially polymeric.
19. The article of claim 15, wherein the radiation-curable composition is suitable for forming a transparent pressure-sensitive adhesive.
20. The article of claim 15, wherein the radiation-curable composition has a sufficiently low shrinkage such that upon curing it maintains intimate contact with the recessed faces.
21. The article of claim 15, wherein the reflective film is discontinuous, and the radiation-curable composition is suitable for forming a covalent bond with exposed portions of the body layer.

A version marked up to show changes made to the claim(s) relative to the previous version of the claim(s) is attached.

REMARKS

Claims 16-21 have been amended. Claims 1-21 are pending.

Claims 1-14 stand rejected under 35 U.S.C. 102(b) as being anticipated by either U.S. 3,684,348 (the 348 Patent) or U.S. 3,810,804 (the 804 Patent). The two patents are related as parent and divisional patents.

Claims 15-21 stand rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 5,512,219 (the 219 Patent).

Claims 1-21 stand rejected under the judicially created doctrine of obviousness-type double patenting over the claims of U.S. 6,280,822.

Applicants submit the following arguments in support of their position that the claims are patentable.
